

**Press Release: 12<sup>th</sup> April 2007**

## **Oasis Software expands after record year**

Leading Australian Practice Management provider Oasis Software has expanded its business development, consultancy and customer service capabilities with the recent employment of two new staff members.

This expansion comes as a result of the significant sales growth in 2006, which saw new unit sales of both Oasis software and EXACT increase by 28% from the previous year.

Factors behind the result have been the increased focus on product innovation, re-energising the distribution channel and an increasing focus on improved customer service.

With a total of over 1500 sites the company is now the clear leader in the Australian market.

The new appointments include:

**Tracy Penn** who joins the Oasis team on a full time basis and will focus her time on Victorian sales, national business development activities and the expansion of consultancy services to the customer base throughout Australia.

**Brent Corneille** also joins the expanding Oasis national support centre based in Melbourne. Brent holds an Advanced Diploma in Computer Systems Engineering and brings with him extensive customer support and network administration expertise.
