

Oasis Practice Management Software

Clinical Notes

The Oasis Clinical Notes system is an audited line by line record of treatment performed on each patient. The Clinical Note System is easily accessible, easy to read and easy to interpret.

Note Taking Process				Abbreviation Libraries							
Clinical Notes				<table border="1"> <tr> <td>>> Code</td> <td>#A2</td> </tr> <tr> <td>01. Phrase/Word</td> <td>Rx Amoxicillin 2.0g 1 hour before dental appointment</td> </tr> </table>		>> Code	#A2	01. Phrase/Word	Rx Amoxicillin 2.0g 1 hour before dental appointment		
>> Code	#A2										
01. Phrase/Word	Rx Amoxicillin 2.0g 1 hour before dental appointment										
Procedure Date	Doctor No.	Doctor's Name	Initials	<p>With Oasis, you can build libraries of abbreviation words and phrases (we give you a standard set on installation). These abbreviation records can be grouped into topics. Abbreviations can be inserted anywhere into a Clinical Note by typing in the code or by mouse click on the list appearing in the Clinical Notes Entry Screen. The Abbreviation system directly speeds up the note taking process and Oasis enables you to customize the libraries to suit your own needs.</p>							
5-06-2005	01	Dr Number 1	FS								
Rx Amoxicillin 500 mg 20's q.i.d. panadeine forte 20's i-ii tabs 4 hrly prn				<p>Notes can be created from any of the Oasis Treatment screens as treatment is performed. These notes can be edited or extended on the day. You can also create your own "ad hoc" notes from within any treatment related program.</p>							
Audit Control				Colors, Images and Pictures							
<p>Oasis uses a unique algorithm key system to control clinical auditing. The authoring workstation can delete or edit the note only on day of treatment. Notes can be hidden from normal view but exposed for a complete audit if required. The Algorithm key is based on your note's text. Oasis can tell you if text has been changed outside the Oasis environment—particularly helpful in medico-legal issues.</p>				<p>The Oasis Clinical Note system is not simply a text retrieval system. Each record can also include Colors, Images and Pictures.</p> <p>COLORS can be used to identify a certain type of treatment or to distinguish one practitioner's notes from another.</p> <p>IMAGES. Each note can have a linked image. The image can be acquiring using a variety of sources. For example, you may want to show an anatomical image or x-ray relating this the clinical note itself.</p> <p>PICTURE ICONS. Each note can have an associated picture icon. This is great for identifying or highlighting treatment type, warning, reminder etc. You use the inbuilt Oasis Icon Editor to create your own icon library that you can link to your Clinical Notes.</p>							
Note Search				<table border="1"> <thead> <tr> <th>Clinical Procedure/Description</th> <th>Status</th> <th>Image</th> </tr> </thead> <tbody> <tr> <td>Rx Amoxicillin 500 mg 20's q.i.d. panadeine forte 20's i-ii tabs 4 hrly prn</td> <td></td> <td></td> </tr> </tbody> </table>		Clinical Procedure/Description	Status	Image	Rx Amoxicillin 500 mg 20's q.i.d. panadeine forte 20's i-ii tabs 4 hrly prn		
Clinical Procedure/Description	Status	Image									
Rx Amoxicillin 500 mg 20's q.i.d. panadeine forte 20's i-ii tabs 4 hrly prn											
				<h3>Clinical Note Presentation</h3> <p>Clinical Notes can be printed in a variety of formats or exported to PDF and emailed. Clinical Notes can be exported for audit purposes to the Oasis Document System.</p> <p>Alternatively, Oasis Clinical Notes can be imported directly into the Oasis Presentation Manager for enhanced processing or queried using the optional Oasis Query Report Writer.</p>							
<p>To facilitate note listings, Oasis enables you to list notes in chronological order by selected phrase or by substring search. (eg all notes where the word "muscular" is present).</p>
