

*OASIS Health  
makes  
practice...  
perfect*

*Choose Oasis Health, and you're choosing a practice management solution that has the essential tools to run a modern productive practice.*

You'll gain efficiencies through better management of patient appointments, simplified billing, better practice workflows, detailed clinical notes and reporting tools that show you in real-time how the practice is performing, all from one easy to use practice-wide system.

Oasis Health has built a strong reputation with Medical Specialists and Allied Health professionals throughout Australia. It is particularly popular amongst procedural specialists including O&G's, Plastic Surgeons, ENT Specialists and Orthopaedic Surgeons. Oasis Health also helps improve the way Allied Health professionals run their practices by streamlining workflows and automating repetitive administration tasks.

Oasis Health is used in a wide variety of practice environments including:

**Medical Specialists:**

Cardiologists, Cosmetic Surgeons, Dermatologists, ENT Specialists, General Surgeons, Maxillofacial Surgeons, O&G's, Orthopaedic Specialists, Paediatricians, Plastic Surgeons, Respiratory Physicians, Urologists, Vascular Surgeons

**Allied Health Practices:**

Acupuncturists, Chiropractors, Chiropody, Cosmetic Clinics Naturopaths, Nutritionists, Optometrists, Podiatry, Physiotherapists

Contact us for a demonstration and we'll show you how Oasis Health will make an immediate impact on the way you run your practice and the service you deliver to patients.

## WHAT'S SO GREAT ABOUT THE OASIS HEALTH SOLUTION?

The Oasis solution is modular so you can select the functionality you need to meet today's operational requirements (and budget) – safe in the knowledge that more functionality can be added as your practice requires. Some of the key features of Oasis Health include:

**Easy to Learn and Use** Oasis Health has been specifically design with the user experience in mind. Our screen layouts and the use of short-cut icons mean that new users can pick up the system with ease. Day to day operations are also streamlined with quick access to patient information and other commonly used functionality.

**Appointment Book** Cut and paste functionality means appointments can be easily set-up, amended, deleted, copied and linked. Use your appointment book to create theatre and procedure lists and schedule patients for optimal use of practice time. Know instantly which patients require future appointments or additional follow up, all from one screen.

**Patient Management** An extremely flexible database allows you to access detailed patient information and correspondence from any computer in the practice. The patient database can be effectively utilised to improve patient communication with time-saving recall and marketing strategies. Unique customisable fields allow practices to track patient information particular to their area of specialty.

**Clinical Notes** Provides a line-by-line record of treatment performed as it occurs. Notes can be edited or extended on the day or you can create your own ad hoc notes from any treatment related program. Audit and security features ensure that once recorded, notes can not be tampered with.

**Recalls and Marketing** A wide range of time-saving recall and marketing strategies are available including Word merge, telephony, SMS and email options. Oasis Health gives you the tools to utilise your patient database more effectively.

**Automated Billing and Financial Management** Setting up new fee structures is straight forward, allowing the practice to create any number of pricing plans. The breadth of functionality available ensures that no matter how a patient chooses to settle their account, the system can accommodate it.

**Management Reporting and Statistics** Powerful management reports and practice statistics are standard. Examples of just a few of the reports include:

- Activity Report
- Appointment Analysis Report
- Cashing Up Report
- Treatment Analysis Report
- Debtors Report

These are just some of the revealing reports that tell Practice Managers what is really happening in the practice.

**Patient X-rays, Photos and Document** Import and associate patient digital X-rays, photos and scanned documents with a patient file and specific clinical notes, with everything stored in one "paper-less" location you'll have all the relevant patient information at your fingertips.

**Automated Task Management** Free yourself from the chores. Using task manager you can automatically produce reports, run back-ups, automate patient communication and send out reminders and notes to any workstation in the practice.

# CHOOSE OASIS HEALTH BECAUSE

- YOUR CASH FLOW WILL IMPROVE
- YOUR PRACTICE WILL BE MORE EFFICIENT
- YOUR PATIENT DATABASE WILL BE UTILISED EFFECTIVELY
- YOUR PATIENTS WILL NOTICE THE IMPROVED SERVICE
