

Oasis and Software of Excellence join forces

5th December 2005

It is with great pleasure that we are able to announce that Oasis Software Pty Ltd and Software of Excellence Australia Ltd have joined forces to develop, market and support both the OASIS and EXACT Practice Management solutions in the local market. Together the combined business becomes the clear market leader in Australia with over 1500 sites and unequalled reputation for delivering quality solutions to Dental professionals.

The agreement takes effect immediately and both businesses will continue to operate as standalone entities. Anne and Noel will remain as General Managers of Oasis and there will be no changes to existing Oasis agents in other states or any aspect of support arrangements which will continue to operate from the National Support Centre in Melbourne.

Both the Oasis and Software of Excellence products will be retained and further developed along separate development paths - as they meet the needs of differing segments of the market. The general release of Oasis 8.24 will continue as planned and is scheduled for early 2006.

One of the many benefits of the new relationship is that it allows us to invest significantly in new development and support resources at our Melbourne office, the results of which will have an extremely positive impact on customers as we continue to enhance the level of support and product functionality you receive from Oasis.

We have long respected the reputation that Software of Excellence has enjoyed in the Australian marketplace and have found a great deal in common between the two companies. We believe that our achievements in the Australian marketplace coupled with Software of Excellence global expertise and success will bring a great deal of opportunity and benefits to our customers, our people and the marketplace.
