Enhanced Dental Treatment

The OASIS Enhanced Dental Treatment Module can be used in two major ways

Firstly by practices who wish to customize the OASIS charting interface to suit individual requirements.

Secondly by specialist practices who require more advanced clinical recording functions that are not catered for by the OASIS standard treatment system.

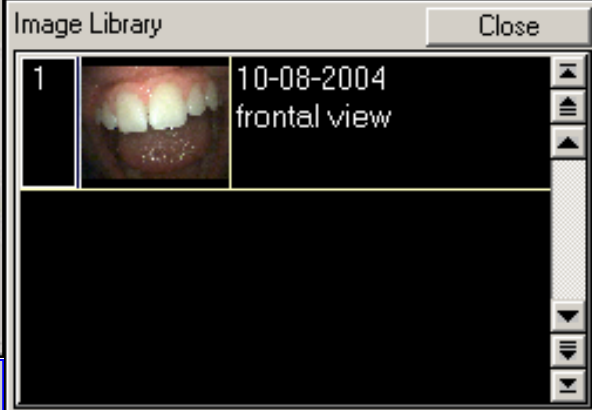

Specialist Notes

The Specialist Notes function lets you define up to 99 Clinical Notes Types and up to 9 columns for each clinical note entry. The program is ideal for recording endodontic information and orthodontic visit details.

Specialist Charting

The Oasis Specialist Charting program has been installed in a range of practices including Pediatric, Endodontics, Prosthodontics and Orthodontics. The Specialist Charting program offers an integrated environment for the display of Specialist Notes, Diagnosis Sheets, Image Libraries and mixed dentition charting.

Custom Icon Designer

The Icon Designer function lets you customize the 99 Speed that appear on the dental charting screen. You can include predefined icons from any source or alternatively paint your own using our custom Icon Editor.

Specialist Plans/Diagnosis Sheets

Date	Description
09-08-2004	Medical History
10-08-2004	Orthodontic Worksheet

Prompt	Details
Notes

Archform	
CrossBite (A/P	

Diagnosis Sheets

The Diagnosis Sheets function lets you define up to 99 Screen Forms each with up to 45 user definable prompts. Prompts can be linked to lookup tables and standard paragraphs. Diagnosis Sheets are great for recording Medical Histories, Initial Examinations, Xray Records etc. Diagnosis Sheets can also be linked to Charting Speed Buttons.
